## Company Overview

# Long-Term Value Drivers

## □ Printer & Consumable - Annuity Model; Compounding Installed Base

Higher share of revenue from high-margin recurring consumables, spares & services vs. low margin printer sales

Installed printers generate predictable cash flows over 7-8 years due to production line integration and high switching costs

22,000 printers installed, adding 2,500 - 3000 units annually, creating a growing foundation for recurring revenue

## □ Smart Global Acquisitions and New Technologies

The strategic global acquisitions of Markprint BV, Codeology UK, V Shapes assets helps in diversifying the company's portfolio into future high-growth areas, including digital printing, automation, sustainable packaging, and advanced track-and-trace technologies.

This niche-acquisition-driven strategy underscores a clear focus on long-term value creation, operational synergies, and alignment with global trends toward digitization and sustainability in packaging and marking solutions

## □ Superior Return Ratios and Cash Flows in Standalone Business

ROCE of 15-20%+, reflecting disciplined capital allocation and excellent profitability on invested capital.

ROE remains robust, frequently between 15-20% on a reported basis

Annual operating cash flows consistently ≈₹50 crore over multiple years, with strong EBITDA-to-cash conversion of ~65%. This supports substantial free cash flow.

## □ Regulatory and Habit-Driven Demand

Coding/marking essential for compliance (batch numbers, QR codes) across multiple industries (FMCG, healthcare etc) and for efficient track and trace supply chain solutions.

# Our 3 Pronged Long Term Growth Strategy

# Our Evolution in Coding and Marking Business

## India - Standalone Business

- The Coding and Marking Industry in India today stands at approx. Rs 2000 -2200 crore.
- The industry is dominated in India by 4 key players including Control Print Ltd (the only Indian company) - these 4 players contribute to nearly 80% of the domestic coding and marking business.
- Control Print today has an overall market share of 18-20% of the organized players.
- The overall market is expected to grow at 1.5x to GDP.
- Control Print has continued to grow at a faster pace than the overall industry and today stands at Rs 385 crore (FY25) in the Indian Standalone entity.

## The International Business - Long Term Growth Strategy

- Markprint and Codeology bring to the table an important but complimentary diversification to our existing core business in coding and marking.
- While on one hand we wish to scale up our offerings and business in international markets, on the other hand we aim to manufacture and sell these products solutions in India as well.
- Our initial efforts have been met with success with key orders from key customers.
- Further we have setup a subsidiary in the Middle East to target the coding and marking opportunities in the region from our India business as well from Markprint and Codeology.
- This will help us outpace and grow beyond the standard growth rate in our traditional business
